Minecraft - Pi Edition

Minecraft – Pi Edition runs on Raspbian "wheezy" with XWindows. If you need to set that up, visit http://www.raspberrypi.org/downloads and follow the detailed instructions within.

1. Boot up your Raspberry Pi with Raspbian.

2. If you haven't set XWindows to start automatically upon boot, type in "startx".

3. Next click the icon for LXTerminal to open a new terminal window.

4. Use the following commands (in bold) to download and launch:

```
$ wget https://s3.amazonaws.com/assets.minecraft.net/pi/minecraft-pi-0.1.1.tar.gz
$ tar -zxvf minecraft-pi-0.1.1.tar.gz
$ cd mcpi
$ ./pinecraft-pi
```
